Sharma, R.K. and Bakhshi, N.N.
Catalytic conversion of de-pitched tall oil to fuels and chemicals over H-ZSM-5: single and dual reactor system 1

Shimizu, M., see Nishimura, S. 19

Sotelo, J.L., see Uguina, M.A. 183
Spronk, R. and Mol, J.C.
Regeneration of rhenium-based catalysts for the metathesis of propene 143
Takagi, Y., see Nishimura, S. 19
Takeoka, S., see Nishimura, S. 19
Takeuchi, G., Okazaki, H., Yamaye, M. and Kito, T.
Isopropylation of dibenzofuran over solid acid catalysts 49
Teruuchi, K., Habazaki, H., Kawashima, A., Asami, K. and Hashimoto, K.
Amorphous nickel–base alloy catalysts for oxidation of carbon monoxide by oxygen and nitric oxide 79
Tijani, A., Coq, B. and Figueras, F.
Hydrogenation of para chloronitrobenzene over supported ruthenium based catalysts 255
Uemiya, S., Koike, I. and Kikuchi, E.
Promotion of the conversion of propane to aromatics by use of palladium membrane 1 71
Uguina, M.A., Sotelo, J.L. and Serrano, D.P.
Toluene disproportionation over ZSM-5 zeolite: effects of crystal size silicon-to-aluminium ratio, activation method and pelletization 183
Uytterhoeven, L., see Parton, R. 131
Uytterhoeven, L., see Martens, J.A. 95
Vedrine, J.C., see Millet, J.-M. 209
Yamaye, M., see Takeuchi, G. 49
Yong, Y.-S., Kennedy, E.M. and Cant, N.W.
Oxide catalysed reactions of ethylene oxide under conditions relevant to ethylene epoxidation over supported silver 31

Subject Index

Acid sites
Oxide catalysed reactions of ethylene oxide under conditions relevant to ethylene epoxidation over supported silver 31

Acidity
On the enhanced dehydrogenation versus cracking ability of an acidic gallium-MFI: A tentative acid base interaction model 199

Alkane conversion
Synergism of ZSM-22 and Y zeolites in the bifunctional conversion of n-alkanes 131

Alkanes
On the enhanced dehydrogenation versus cracking ability of an acidic gallium-MFI: A tentative acid base interaction model 199

Alkenes
Catalytic conversion of de-pitched tall oil to fuels and chemicals over H-ZSM-5: single and dual reactor system 1

Alloying effect
Hydrogenation of para chloronitrobenzene over supported ruthenium based catalysts 255

Ammonia
Selective catalytic reduction of nitric oxide with ammonia on vanadium oxide catalysts supported on titania–alumina L8

Ammonia adsorption
Modifications of surface properties of nickel/silica catalysts by nitrogen-containing compounds. Part I: Ammonia 233

Aromatics
Catalytic conversion of de-pitched tall oil to fuels and chemicals over H-ZSM-5: single and dual reactor system 1

Aromatization
Promotion of the conversion of propane to aromatics by use of palladium membrane 1 71

Bayerite
Bayerite-promoted caustic leaching of single phase $NiAl_3$ and Co_2Al_9 alloys to produce highly active Raney nickel and Raney cobalt catalysts 19

Butyl phthalate
Infrared spectral characterization of supported propene polymerization catalysts. A link to catalyst performance 221

Carbon monoxide oxidation
Amorphous nickel–base alloy catalysts for oxidation of carbon monoxide by oxygen and nitric oxide 79

Catalyst characterization (IR)
Infrared spectral characterization of supported propene polymerization catalysts. A link to catalyst performance 221

Catalyst characterization (IR, magnetic measurements)
Modifications of surface properties of nickel/silica catalysts by nitrogen-containing compounds. Part I: Ammonia 233

Catalyst characterization (Mössbauer, XRD)
Role of cesium in iron phosphates used in isobutyric acid oxidative dehydrogenation 209

Catalyst preparation (dry mixing)
Bicomponent catalyst for the selective formation of ethanol from synthesis gas 153

Cesium
Role of cesium in iron phosphates used in isobutyric acid oxidative dehydrogenation 209

Chloronitrobenzene
Hydrogenation of para chloronitrobenzene over supported ruthenium based catalysts 255

Co-processing
Catalytic conversion of de-pitched tall oil to fuels and chemicals over H-ZSM-5: single and dual reactor system 1

Cobalt–aluminium alloy
Bayerite-promoted caustic leaching of single phase $NiAl_3$ and Co_2Al_9 alloys to produce highly active Raney nickel and Raney cobalt catalysts 19

Copper/zinc oxide
Support effects in methanol synthesis over copper-containing catalysts 117

Copper/ZSM-5
Temperature-programmed desorption of nitric oxide over Cu-ZSM-5 L1

Cracking
On the enhanced dehydrogenation versus cracking ability of an acidic gallium-MFI: A tentative acid base interaction model 199

Crystal size
Toluene disproportionation over ZSM-5 zeolite: effects of crystal size silicon-to-aluminium ratio, activation method and pelletization 183
Decane conversion
Selective conversion of decane into branched isomers: a comparison of Pt/ZSM-22, Pt/ZSM-5 and Pt/USY zeolite catalysts 95
Decomposition
Temperature-programmed desorption of nitric oxide over Cu-ZSM-5 L1
Dehydrogenation
On the enhanced dehydrogenation versus cracking ability of an acidic gallium-MFI: A tentative acid base interaction model 199
Dibenzofuran
Isopropylation of dibenzofuran over solid acid catalysts 49
Ethanol formation
Bicomponent catalyst for the selective formation of ethanol from synthesis gas 153
Ethylene oxidation
Oxide catalysed reactions of ethylene oxide under conditions relevant to ethylene epoxidation over supported silver 31
Ethylene oxide
Oxide catalysed reactions of ethylene oxide under conditions relevant to ethylene epoxidation over supported silver 31
Gallium MFI
On the enhanced dehydrogenation versus cracking ability of an acidic gallium-MFI: A tentative acid base interaction model 199
H-ZSM-5
Catalytic conversion of de-pitched tall oil to fuels and chemicals over H-ZSM-5: single and dual reactor system 1
Hydrogen separation
Promotion of the conversion of propane to aromatics by use of palladium membrane 1 71
Hydrogenation
Hydrogenation of para chloronitrobenzene over supported ruthenium based catalysts 255
Iron phosphates
Role of cesium in iron phosphates used in isobutyric acid oxidative dehydrogenation 209
Isobutyric acid
Role of cesium in iron phosphates used in isobutyric acid oxidative dehydrogenation 209
Iscpropylation
Isopropylation of dibenzofuran over solid acid catalysts 49
Magnesium chloride
Infrared spectral characterization of supported propene polymerization catalysts. A link to catalyst performance 221
Membrane reactor
Promotion of the conversion of propane to aromatics by use of palladium membrane 1 71
Metal content analysis
Regeneration of rhenium-based catalysts for the metathesis of propene 143
Methanol synthesis
Support effects in methanol synthesis over copper-containing catalysts 117
Nickel
Amorphous nickel–base alloy catalysts for oxidation of carbon monoxide by oxygen and nitric oxide 79
Nickel–aluminium alloy
Bayerite-promoted caustic leaching of single phase $NiAl_3$ and Co_2Al_9 alloys to produce highly active Raney nickel and Raney cobalt catalysts 19
Nickel–base alloy
Amorphous nickel–base alloy catalysts for oxidation of carbon monoxide by oxygen and nitric oxide 79
Nickel/silica
Modifications of surface properties of nickel/silica catalysts by nitrogen-containing compounds. Part I: Ammonia 233
Nitric oxide
Amorphous nickel–base alloy catalysts for oxidation of carbon monoxide by oxygen and nitric oxide 79
Nitric oxide desorption
Temperature-programmed desorption of nitric oxide over Cu-ZSM-5 L1
Nitric oxide reduction
Selective catalytic reduction of nitric oxide with ammonia on vanadium oxide catalysts supported on titania–alumina L8

Nitrogen
Modifications of surface properties of nickel/silica catalysts by nitrogen-containing compounds. Part I: Ammonia 233
Oxidative dehydrogenation
Role of cesium in iron phosphates used in isobutyric acid oxidative dehydrogenation 209
Palladium membrane
Promotion of the conversion of propane to aromatics by use of palladium membrane 1 71
Particle size effect
Hydrogenation of para chloronitrobenzene over supported ruthenium based catalysts 255
Pelletization
Toluene disproportionation over ZSM-5 zeolite: effects of crystal size silicon-to-aluminium ratio, activation method and pelletization 183
Platinum/zeolite
Selective conversion of decane into branched isomers: a comparison of Pt/ZSM-22, Pt/ZSM-5 and Pt/USY zeolite catalysts 95
Polymerization
Infrared spectral characterization of supported propene polymerization catalysts. A link to catalyst performance 221
Propane
Promotion of the conversion of propane to aromatics by use of palladium membrane 1 71
Propene
Infrared spectral characterization of supported propene polymerization catalysts. A link to catalyst performance 221
Propene
Promotion of the conversion of propane to aromatics by use of palladium membrane 1 71
Propene metathesis
Regeneration of rhenium-based catalysts for the metathesis of propene 143
Raney cobalt
Bayerite-promoted caustic leaching of single phase $NiAl_3$ and Co_2Al_9 alloys to produce highly active Raney nickel and Raney cobalt catalysts 19
Raney nickel
Bayerite-promoted caustic leaching of single phase $NiAl_3$ and Co_2Al_9 alloys to produce highly active Raney nickel and Raney cobalt catalysts 19
Regeneration
Regeneration of rhenium-based catalysts for the metathesis of propene 143
Rhenium heptoxide/alumina
Regeneration of rhenium-based catalysts for the metathesis of propene 143
Rhodium
Bicomponent catalyst for the selective formation of ethanol from synthesis gas 153
Ruthenium
Hydrogenation of para chloronitrobenzene over supported ruthenium based catalysts 255
Selectivity (branched isomers)
Selective conversion of decane into branched isomers: a comparison of Pt/ZSM-22, Pt/ZSM-5 and Pt/USY zeolite catalysts 95
Selectivity (oxygenates)
Bicomponent catalyst for the selective formation of ethanol from synthesis gas 153
Selectivity modifications
Modifications of surface properties of nickel/silica catalysts by nitrogen-containing compounds. Part I: Ammonia 233
Silicon/aluminium ratio
Toluene disproportionation over ZSM-5 zeolite: effects of crystal size silicon-to-aluminium ratio, activation method and pelletization 183
Silver/alumina
Oxide catalysed reactions of ethylene oxide under conditions relevant to ethylene epoxidation over supported silver 31
Silver/silica
Oxide catalysed reactions of ethylene oxide under conditions relevant to ethylene epoxidation over supported silver 31
Silver/titania
Oxide catalysed reactions of ethylene oxide under conditions relevant to ethylene epoxidation over supported silver 31
Solid acid
Isopropylation of dibenzofuran over solid acid catalysts 49

Supported catalysts
Infrared spectral characterization of supported propene polymerization catalysts. A link to catalyst performance 221
Synergism
Synergism of ZSM-22 and Y zeolites in the bifunctional conversion of n-alkanes 131
Syngas conversion
Bicomponent catalyst for the selective formation of ethanol from synthesis gas 153
Tall oil
Catalytic conversion of de-pitched tall oil to fuels and chemicals over H-ZSM-5: single and dual reactor system 1
Temperature-programmed desorption
Temperature-programmed desorption of nitric oxide over Cu-ZSM-5 L1
Temperature-programmed reduction
Bicomponent catalyst for the selective formation of ethanol from synthesis gas 153
Temperature-programmed reduction
Support effects in methanol synthesis over copper-containing catalysts 117
Temperature-programmed reduction
Regeneration of rhenium-based catalysts for the metathesis of propene 143
Titanium tetrachloride
Infrared spectral characterization of supported propene polymerization catalysts. A link to catalyst performance 221
Toluene disproportionation
Toluene disproportionation over ZSM-5 zeolite: effects of crystal size silicon-to-aluminium ratio, activation method and pelletization 183
Upgrading
Catalytic conversion of de-pitched tall oil to fuels and chemicals over H-ZSM-5: single and dual reactor system 1
Vanadium oxide/titania–alumina
Selective catalytic reduction of nitric oxide with ammonia on vanadium oxide catalysts supported on titania–alumina L8
Zeolites
Toluene disproportionation over ZSM-5 zeolite: effects of crystal size silicon-to-aluminium ratio, activation method and pelletization 183
Zeolites
Synergism of ZSM-22 and Y zeolites in the bifunctional conversion of n-alkanes 131
Zeolites
Selective conversion of decane into branched isomers: a comparison of Pt/ZSM-22, Pt/ZSM-5 and Pt/USY zeolite catalysts 95
Zeolites
Catalytic conversion of de-pitched tall oil to fuels and chemicals over H-ZSM-5: single and dual reactor system 1
Zeolites
Temperature-programmed desorption of nitric oxide over Cu-ZSM-5 L1
Zeolites
On the enhanced dehydrogenation versus cracking ability of an acidic gallium-MFI: A tentative acid base interaction model 199
Ziegler-Natta
Infrared spectral characterization of supported propene polymerization catalysts. A link to catalyst performance 221
ZSM-22
Synergism of ZSM-22 and Y zeolites in the bifunctional conversion of n-alkanes 131
ZSM-5
Toluene disproportionation over ZSM-5 zeolite: effects of crystal size silicon-to-aluminium ratio, activation method and pelletization 183
